

Word Search Puzzle: 35 Dolphin Species

[Paws and Claws Society, Inc.](#)

Can you guess how many species of dolphins swim in the rivers, oceans, and seas of our planet? According to most scientists, there are more than 32 species of dolphins; some say as many as 40! Did you know that a porpoise is not a dolphin? This puzzle (from the [Fall/Winter 2023 issue of Burlington Reports](#)) contains the names of 35 dolphin species. Can you find them all? (And are you surprised to learn that the Orca, or Killer Whale, is actually a species of dolphin?)
